Projects

Portifolio, *URL: herokk1.github.io/Portifolio2.0/*
A Website focused on summarizing my skills.
Online via Github.io.

Projeto LoFi
Website with VHS-inspired look and integrated with youtube API. The radio "Lofi Girl" plays live along with the broadcast made on youtube. Uses TailwindCSS.

Hardware Marketplace
Website made with ReactJS, Bootstrap and TypeScript. Simulates a hardware store with a functional shopping cart.

Weather and Clock
Website integrated with a clock and OpenWeather API, making it possible to acquire weather information from virtually any city in the world.

Kermit
A discord bot that is able to create custom images based on each discord server member. It welcomes new members and says goodbye with those custom images. Built with JavaScript, DiscordJS and Canvas API.
